

Peel District School Board

Application

Student Information

Please enter the student's **legal name** as it appears on their **birth certificate**.

Legal First Name

Suganthan Vairavasamy

Legal Middle Name

Legal Surname/Last Name

Vairavamuthu

Legal Suffix

☐ Check here if student has a preferred name for school use

Gender **Male**

Voluntary Self-Identification

Does the applicant have an Individualized Education Plan (IEP)?

No

*Date of Birth** **1/3/2012**

Current 2025-26 Grade

8

Home/Residential Information

Home Phone Number **647-297-8533**

☐ Check here if the above phone number is unlisted

Street Number and Name **37 Tindale Rd**

Apt #

City **Brampton**

Province **Ontario**

Postal Code **L6V 2G8**

School Locator - By clicking on the 'Find Zoned Schools' button below, you will find your home school by address for the 2026-27 school year. All online registrations are subject to final address and boundary verification by the school.

The school locator may contain errors and/or omissions; please contact the school directly if you have any questions.

Boundary Zone **RLCP Secondary Zone 2**

Address was verified.

Previous Education

Has your student EVER attended school in the Peel District School Board (PDSB)?

Program Selection

Please note: Program Choice # does not indicate preference. Students will be considered equally for all selections, regardless of choice number.

Program Choice #1

Program Choice **International Business and Technology**

School Choice **North Park SS**

Non-refundable Program Application Fee

\$40.00

☒ Add Additional Program Choice

Program Choice #2

Program Choice **International Baccalaureate**

School Choice **Turner Fenton SS**

Non-refundable Program Application Fee

\$40.00

☒ Add Additional Program Choice

Program Choice #3

Program Choice **SciTech (Science and Technology)**

School Choice **Chinguacousy SS**

Non-refundable Program Application Fee

\$40.00

☒ Add Additional Program Choice

Program Choice #4

Program Choice **Transportation Engineering and Technology**

School Choice **Bramalea SS**

Non-refundable Program Application Fee

\$0.00 - No Fee

☒ Add Additional Program Choice

Program Choice #5

Program Choice **Advanced Placement**

School Choice **Central Peel SS**

Non-refundable Program Application Fee

\$40.00

☐ Add Additional Program Choice

Application Information

Please answer the below questions to the best of your ability.

International Baccalaureate

*Is this student a current
International
Baccalaureate student at
Peel District School Board?* **No**

International Business and Technology

In a video submission that runs a MAXIMUM of 1 minute, 30 seconds, please address the following:

Briefly explain why you are interested in the International Business and Technology Program and why you consider yourself a good candidate. Include details about your strengths, interests, and future career aspirations.

Next, explain what extracurricular or leadership activities (clubs, teams, volunteer opportunities, etc.) you have participated in over the last two years and how the skills you learned during those opportunities would transfer/apply/prepare you for the International Business and Technology Program.

Be sure to showcase your personality. Creativity with your video submission is not a requirement but may be an asset.

Please use ONLY one of the following submission processes:

1. If you are a Peel student please upload your video to your school google drive and ensure the link is shareable when you submit it with your application.
2. Put your video on an unpublished YouTube channel and submit the link with your application.

****Please use only one of these two methods to share your video and ensure that you have your SHARING permissions turned ON.**

Failure to submit the video link in the correct format may result in a mark of zero on that component.

Please copy and paste the video URL link here:

Transportation, Engineering and Technology

Describe how you found out about this Regional Transportation Engineering and Technology program and what you did to gain more information about it?

I found out about the Regional Transport Engineering and Technology program under the Region Learning Choices Program in my school's morning announcements. I was interested thus I asked around with friends, talked with

my teacher and student counselors, and researched online on the Peel District School Board's website. This led me to discover more information about it and realized it was connected with my passion, international ships that carry goods, and people.

What area(s) of transportation are you interested in air, land and/or sea? Describe what your career aspirations are following secondary school in relation to the transportation industry?

I'm highly interested in the area of sea transport as I'm fascinated and eager to learn how to manage and navigate international ships. After secondary school I want to enroll in a university with courses on nautical science, marine engineering, marine transportation, or marine operations/navigations such as U.S Merchant Marine Academy, or the Norwegian University of Science and Technology. After my university courses are complete, I'll slowly climb the ranks to an international ship's captain and then start or manage my own navigation and shipping company.

Describe one or more meaningful, hands-on learning experience(s) that you have had at school or outside of school (ex. club, community recreational program, class activity/project, hobby, team/sport or volunteer work). Discuss what you learned from each experience and the skills you developed from doing it (ex. skills may include: building, designing, fixing, programming, problem solving, collaborating and/or testing).

I joined SwiftKids at 7th grade, a programming club that teaches basic Swift mobile app development. I learned the process to develop apps, programming concepts (loops, buttons, etcetera), and how to code in basic Swift. I developed skills such as designing apps, fixing errors, and programming in Swift. I've also improved my problem solving abilities by challenges that require logic to be solved, collaboration with members to understand material and do group projects, and testing apps properly for bugs. I've also joined my school's green energy club during 7th grade where we gained experience with balsa wood, miter shears, and wind energy. As my 4 member team's final project we made a windmill out of card board and wood that could power a small lightbulb. I learned how to cut wood at angles, properties of wires and electricity, and the importance of green energy in today's environment. Some skills I acquired include building with woods and tools, designing on blueprints, problem solving to fix issues with my wiring and building, testing the windmills, batteries, and structural stability, and assertively collaborating with my team to fulfill our goal. In 7th grade joining my school's film crew let me create films for months, events, and highlights of classes. This allowed me to express my voice as a student in a way everyone could see. I learned how to edit videos in Premier Pro, interview people, record a variety of camera shots, and collaboration with other students. Skills that were learned by me in film crew include how to design a video's layout, problem solve for example if audio is cut out from an interview, if footage isn't at it's highest quality, and more, collaborating with my fellow videographers to properly edit and film videos, and testing with different angles, effects, music, and getting feedback from people. I have also been in my school's band since 6th grade as the only Tuba. Being the only Tuba forced me to adapt more as a solo learner compared to other my other peers as the band director wasn't experienced with my instrument so she could only offer little advice and other students had a chance to speak with peers with the same instrument unlike me. This led me to self learn the tuba with books, videos, and articles from the internet. I learned how to play the tuba, and problem solving with this experience. During 6th and 7th grade in IBT I learned how to control Lego robots such as the spike prime and Ev3's so I recently joined the robotics club in 8th grade during October 2025. I have learned about programming in blocks, and python, working with sensors, and proper methods to communicate with my peers, throughout my whole robotics journey. Some skills I acquired are programming in blocks, and python, testing code, problem solving to solve the challenges, building robots, effective collaboration, and fixing errors.

Parent / Legal Guardian Information

Parent / Legal Guardian 1

First Name Abinaya

Last Name Rajaram

Relationship to Student

Mother
